

# HOT PLUS®

**DECREASES THE  
INCIDENCE OF  
HEAT STRESS  
IN ANIMALS**

# HOT PLUS®

## complementary feed for all animal species

Hot Plus must be used with a dose of 100 g per 100 liters of tap water for at least 5-6 days. Its use is especially indicated when the animals are subjected to heat stress. In the case of persistent high temperatures, the treatment can be continued for 30 consecutive days with the same dose.

### **ADDITIVES (PER Kg):**

Vitamins, pro-vitamins and substitutes with a chemically similar effect:

Colin chloride 1,000 mg.

Amino-acids, their salts and similar elements:

L. Lysine 3.2.1 1,000 mg.

Technological additives:

Potassium sorbate E202 1,000 mg.

### **INGREDIENTS (PER Kg):**

Propylene glycol, Sorbitol, Sodium chloride.

### **ANALYTICAL COMPONENTS (% as is):**

Humidity 84.80% - Raw protein 0.10%

Raw oils and fats 0.00% - Raw ashes 2.00%

Raw cellulose 0.00% - Methionine 0.00% - Lysine 0.10%

Sodium 0.8%.

### **INSTRUCTIONS FOR USE:**

Administer added to other feed (100 g for every 100 Kg).

### **EXPIRY DATE:**

12 months.

### **STORAGE:**

Keep in a cool, dry place, away from heat and direct sunlight.

### **PACKAGING:**

1 kg PVC Bottle in boxes (box of 12 bottles not to be sold separately);

5 kg PE Tank.

### **MANUFACTURING SITE:**

Manufactured in our factory with certificate no. ITα 000013RE.
